

# Business Intelligence and Reporting

## BENEFITS

**Build custom reports.** Generate reports using a building-block approach that facilitates easy design and maintenance and helps ensure that each report communicates the right information.

**Improve information analysis.** Export Microsoft FRx reports to Microsoft Office Excel® PivotTable® and PivotChart® formats to analyze information more effectively.

**Simplify the report building-process.** Benefit from the familiar spreadsheet look and feel and allow anyone with the appropriate privileges to create customized reports quickly.

**Maintain reports smoothly.** Eliminate time-consuming processes for updating and maintaining reports through tight integration with Microsoft Dynamics GP.

**Enhance corporate communications and collaboration.** Use multiple report formats and distribution techniques to help ensure that the right financial information is being delivered to the right people.

**Access reports securely.** Establish custom security settings to help ensure that information is accessed only by users with secured rights.

## Microsoft FRx in Microsoft Dynamics GP

Gain control of your financial reporting process with Microsoft® FRx® in Microsoft Dynamics™ GP. Advanced performance capabilities give you comprehensive, highly customizable financial and management reports that are easy to create, distribute, and use.

Automate report and distribution processes to reduce the time employees spend on administrative work, freeing them to analyze information and make informed, strategic decisions that drive your business forward.

*FINISHED MICROSOFT FRx REPORTS are presentation-quality, with drill-down capabilities that enable you to pinpoint detailed information.*

*THE SPREADSHEET LOOK AND FEEL makes it easy for anyone with appropriate access privileges to create customized reports.*

## FEATURES

## MICROSOFT FRx

Custom Report Design	Employ a building-block approach to design reports. Define the rows and columns that will appear in each report and reporting tree to establish the relationship between reporting units.
Familiar Spreadsheet Interface	Create financial statements easily by leveraging a familiar spreadsheet interface and tight integration with the Microsoft Dynamics GP General Ledger and database structure.
Top-Level Report Analysis	Achieve superior report analysis by consolidating information from multiple companies and data sources—including unposted transactions or base-period referencing—or by creating custom report relationships.
Sophisticated Calculations	Implement mathematics and if/then logic to incorporate reusable complex calculations into your reports.
Report Relationship Customization	Create new reporting relationships by changing the reporting tree structure, without affecting data entry processes or rearranging account segments in the General Ledger.
Currency Translation Support	Smoothly translate currency across multiple accounting systems—including functionality for calculating monthly and annual average and historical rates—and quickly set up currency exchange rate tables with information pulled from General Ledger.
Bottom-Level Report Analysis	Analyze information from summary all the way down to transaction details with Microsoft FRx DrillDown Viewer.™
Multiple Report Formats	View reports on the screen and drill down to underlying data. Print reports for presentations, e-mail them for easy distribution, or export them to spreadsheets for additional analysis.
Web-Based Reports	Publish, store, and manage reports through your intranet while maintaining full drill-down and printing functionality.
Comprehensive Report Books	Organize multiple document types in a single file, including Microsoft FRx reports, Microsoft Office documents, and Microsoft SQL Server™ Reporting Services reports.
Custom Security Settings	Set security by reporting tree level to ensure that information is accessed only by users that have the right permission settings.
Automated Report Delivery and Production	Use Microsoft FRx Report Server to automate the production and distribution of reports in a scalable, high-speed reporting environment.
XBRL Support	Create and publish reports that meet the business and financial data communication standards of extensible business reporting language (XBRL).
